Skills

- HTML5 | CSS3 | JavaScript | TypeScript | React | Next.js | Redux | TailwindCSS | Node.js | NestJS | Vitest | Jest | PostgreSQL | Docker | Prisma | Git | AWS S3 | Cloudflare R2
- SEO | Accessibility | Responsiveness | TDD | DDD | Clean Architecture | SOLID | Clean Code | Business Rules | Functional Requirements | Non-Functional Requirements
- Portuguese: Native, English: Fluent, Spanish: Intermediate

One of my Front-end projects

Exclusive Store

[LIVE](#) | [GITHUB](#)

HTML5 | CSS3 | TypeScript | React | NextJS | TailwindCSS | Stripe API | React-Slick | Material UI | Radix-UI | Figma

- An e-commerce platform built with React and NextJS, incorporating libraries such as React-Slick, Material UI and Radix-UI.
- Uses the Context API for state management and consumes the Stripe API for products and checkout.
- Implements accessibility best practices, ensuring the platform is navigable and usable for all users, including those with disabilities.
- Optimized for SEO with server-side rendering and meta tags, improving search engine visibility and performance.

One of my Back-end projects

Find a Friend API

[GITHUB](#)

TypeScript | Node.js | NestJS | Vitest | PostgreSQL | Docker | Prisma | Cloudflare R2

- The API follows Test-Driven Development (TDD), Domain-Driven Design (DDD), Clean Architecture and SOLID. Uses Cloudflare R2 for attachment upload and storage.
- It is equipped with a comprehensive set of end-to-end and unit tests.
- It connects individuals in search of pets with pet adoption organizations. It provides a platform for organizations to register and validate their identity using JWT.
