DENER ARAUJO PERES

[Portfolio](#) | [LinkedIn](#) | deneruaraujo@gmail.com | [GitHub](#)

Skills _____

- HTML5 | CSS3 | JavaScript | TypeScript | React | Next.js | TailwindCSS | Node.js | NestJS | Vitest | Jest | PostgreSQL | Docker | Prisma | Git

- English Proficiency: Advanced (C1)

One of my Front-end projects _____

Exclusive Store   **[LIVE](#) | [GITHUB](#)**

HTML5 | CSS3 | TypeScript | React | NextJS | TailwindCSS | Stripe API | React-Slick | Material UI | Radix-UI | Figma

- An e-commerce platform built with React and NextJS, incorporating libraries such as React-Slick, Material UI and Radix-UI.

- Uses the Context API for state management and consumes the Stripe API for products and checkout..

- Uses a free design from Figma, made by:**[@mdrimel15](#)**.

One of my Back-end projects_____

Find a Friend API   **[GITHUB](#)**

TypeScript | Node.js | NestJS | Vitest | PostgreSQL | Docker | Prisma | Cloudflare R2

- The API follows Test-Driven Development (TDD), Domain-Driven Design (DDD), Clean Architecture and SOLID.

- To ensure reliability and accuracy, it is equipped with a comprehensive set of end-to-end and unit tests.

- Uses Cloudflare R2 for storage.

- It connects individuals in search of pets with pet adoption organizations. It provides a platform for organizations to register and validate their identity using JWT.
